Evaluate Your Present Note-Taking System

Tips for Finding Major Points in Lectures

The speaker is usually making an important point if he or she:
1. Pauses before or after an idea.
2. Uses repetition to emphasize a point.
3. Uses introductory phrases to precede an important idea.
4. Writes an idea on the board.

Ask yourself:
1. Do I use complete sentences? They are generally a waste of time.
2. Do I use any form at all?
3. Are my notes clear or confusing?
4. Do I capture main points and all subpoints?
5. Do I streamline using abbreviations and shortcuts?

Five Important Reasons to Take Notes

• Notes trigger memories of lecture/reading
• Your notes are often a source of valuable clues for what information the instructor thinks most important (i.e., what will show up on the next test).
• Notes inscribe information kinesthetically
• Taking notes helps you to concentrate in class
• Notes create a resource for test preparation
• Your notes often contain information that cannot be found elsewhere (i.e., in your textbook).

Ways to Reduce and Streamline Note

• Eliminate small connecting words such as: is, are, was, were, a, an, the, would, this, of.
• Eliminate pronouns such as: they, these, his, that, them.
• However, be careful NOT to eliminate these three words: and, in, on.
• Use symbols to abbreviate, such as:
  +, & for and, plus
  = for equals
  - for minus
  # for number
  x for times
  > for greater than, more, larger
  < for less than, smaller, fewer than
  w/ for with
  w/o for without
  w/in for within
  _ for leads to, produces, results in
  _ for comes from
  _ for increase
  _ for decrease
  / for per

  For example: “The diameter of the Earth is four times greater than the diameter of the Moon.”
  Becomes: “Earth = 4x > diameter of Moon.”

• Substitute numerals with symbols, for instance:
  Substitute “one” with 1
  Substitute “third” with 3rd

• Abbreviate:
  Drop the last several letters of a word. For example, substitute “appropriate” with “approp.”
  Drop some of the internal vowels of a word. For example, substitute “large” with “lrg.”
### The Cornell Method

The Cornell Method provides a systematic format for condensing and organizing notes without laborious recopying. After writing the notes in the main space, use the left-hand space to label each idea and detail with a key word or “cue.”

**Method** - Rule your paper with a 2 inch margin on the left leaving a six-inch area on the right in which to make notes. During class, take down information in the six-inch area. When the instructor moves to a new point, skip a few lines. After class, complete phrases and sentences as much as possible. For every significant bit of information, write a cue in the left margin. To review, cover your notes with a card, leaving the cues exposed. Say the cue out loud, then say as much as you can of the material underneath the card. When you have said as much as you can, move the card and see if what you said matches what is written. If you can say it, you know it.

**Disadvantages** - None

**When to Use** - In any lecture situation.

### The Mapping Method

Mapping is a method that uses comprehension/concentration skills and evolves in a notetaking form which relates each fact or idea to every other fact or idea. Mapping is a graphic representation of the content of a lecture. It is a method that maximizes active participation, affords immediate knowledge as to its understanding, and emphasizes critical thinking.

**Advantages** – This format helps you to visually track your lecture regardless of conditions. Little thinking is needed and relationships can easily be seen. It is also easy to edit your notes by adding numbers, marks, and color coding. Review will call for you to restructure thought processes which will force you to check understanding. Review by covering lines for memory drill and relationships. Main points can be written on flash or note cards and pieced together into a table or larger structure at a later date.

**Disadvantages** – You may not hear changes in content from major points to facts.

**When to Use** – Use when the lecture content is heavy and well-organized. May also be used effectively when you have a guest lecturer and have no idea how the lecture is going to be presented.

**Example** –

- **Extrasensory Perceptions**
  - 3 Types
  - Clairvoyance
    - Forecasting the future
  - Telepathy
    - Sending messages
  - Psychokinesis
    - Perceiving events external to the situation
**The Outlining Method**

Dash or indented outlining is usually best except for some science classes such as physics or math.

1. The information which is most general begins at the left with each more specific group of facts indented with spaces to the right.
2. The relationships between the different parts are carried out through indenting.
3. No numbers, letters, or Roman numerals are needed.

**Method** - Listening and then write in points in an organized pattern based on space indentation. Place major points farthest to the left. Indent each more specific point to the right. Levels of importance will be indicated by distance away from the major point. Indentation can be as simple as or as complex as labeling the indentations with Roman numerals or decimals. Markings are not necessary as space relationships will indicate the major/minor points.

**Advantages** - Well-organized system if done right. Outlining records content as well as relationships. It also reduces editing and is easy to review by turning main points into questions.

**Disadvantages** - Requires more thought in class for accurate organization. This system may not show relationships by sequence when needed. It doesn’t lend to diversity of a review attach for maximum learning and question application. This system cannot be used if the lecture is too fast.

**When to Use** - The outline format can be used if the lecture is presented in outline organization. This may be either deductive (regular outline) or inductive (reverse outline where minor points start building to a major point). Use this format when there is enough time in the lecture to think about and make organization decisions when they are needed. This format can be most effective when your notetaking skills are super and sharp and you can handle the outlining regardless of the notetaking situation.

**Example**

<table>
<thead>
<tr>
<th>Extrasensory perception</th>
</tr>
</thead>
<tbody>
<tr>
<td>definition: means of perceiving without use of sense organs.</td>
</tr>
<tr>
<td>three kinds</td>
</tr>
<tr>
<td>- telepathy: sending messages</td>
</tr>
<tr>
<td>- clairvoyance: forecasting the future</td>
</tr>
<tr>
<td>- psychokinesis: perceiving events external to situation</td>
</tr>
<tr>
<td>current status</td>
</tr>
<tr>
<td>- no current research to support or refute</td>
</tr>
<tr>
<td>- few psychologists say impossible</td>
</tr>
</tbody>
</table>

---

**The Charting Method**

If the lecture format is distinct (such as chronological), you may set up your paper by drawing columns and labeling appropriate headings in a table.

**Method** – Determine the categories to be covered in lecture. Set up your paper in advance by columns headed by these categories. As you listen to the lecture, record information (words, phrases, main ideas, etc.) into the appropriate category.

**Advantages** – Helps you track conversation and dialogues where you would normally be confused and lose out on relevant content. Reduces amount of writing necessary. Provides easy review mechanism for both memorization of facts and study of comparisons and relationships.

**Disadvantages** – Few disadvantages except learning how to use the system and locating the appropriate categories. You must be able to understand what’s happening in the lecture

**When to Use** – Test will focus on both facts and relationships. Contents is heavy and presented fast. You want to reduce the amount of time you spend editing and reviewing at test time. You want to get an overview of the whole course on one big paper sequence.

**Example** – Chart format for a history class:

<table>
<thead>
<tr>
<th>Period</th>
<th>Important People</th>
<th>Events</th>
<th>Significance</th>
</tr>
</thead>
<tbody>
<tr>
<td>1861-65</td>
<td>FDR</td>
<td>WWI</td>
<td>U.S.A. Involvement</td>
</tr>
</tbody>
</table>
