Thank for providing a recommendation for an applicant for the Virginia Tech C-Tech2 program. A primary focus of the program is to help develop and sustain the interests of women in engineering. The program allows students to explore applications of engineering, math, and science in a way that is fun and exciting. They will spend the majority of their time involved in hands-on activities designed to increase interest in and knowledge of applications of engineering, math, and science to real world situations. The target population for the program is rising junior and senior high school girls.

If you have any questions, please email Kristy Morrill gracou@vt.edu or call 540-231-7411.
